For Maunnn you will use similar array style for selections by user as similar to password generator, study arrays to depth and and you will be pushing arrays, storing info in local storage or variables

To import a Google Font, you can copy the font's URL from the Google Fonts library and then paste it in your HTML. For this challenge, we'll import the Lobster font.

```
<link href="https://fonts.googleapis.com/css?family=Lobster" rel="stylesheet" type="text/css">
```

You can use double image techniques as mentioned in email old planning to be fixed:

Design rules

Extremely proportionate, geometrically symmetrical, React design shape

1. -Background colours one main white 1st choice

-Some parts 2nd choice, or small geometrical section colours includes parts of illustrations/image data

-Very small parts and geometrical sections third choice includes parts of illustrations/image data (including buttons)

Geometrical (great looking site UI) advantage is great competitive advantage,

Functionality of site must serve functionality of business, must solve the problem business is solving, no extra functionality is needed.
